

Registered disinfectants on the EPA's List N for use against SARS-COV-2 (COVID-19)

Ready-to-Use Disinfectants

Triple Threat Defense Ready-To-Use - #128367 (Lavender) #128371 (Fresh)

- Quaternary disinfectant ideal for any facility that needs to perform routine cleaning and disinfection and wants the convenience of a ready to use solution. Ten minute contact time required.

Germicidal Giant PLUS - #117209

- A versatile, foaming disinfectant and virucide that works in one step. Simply cover surfaces with foam, wait 10 minutes and wipe clean. Ten minute contact time required.

Coil Doctor - #121640

- Formulated for use on evaporative coils in air conditioners, air handling equipment, HVAC cooling coils and other equipment. Kills 99.9% of bacteria. No rinsing needed. Ten minute contact time required.

Discover - #125404-6

- A no-rinse phenol based virucidal disinfectant for hard surfaces. Can be used to sanitize fabric, leather and other soft surfaces. Ten minute contact time required.

Discover TR - #121222-12

- A total-release disinfecting "bomb". Product is dispersed into the air. As the disinfectant settles on exposed surfaces, any pathogens on those surfaces are eliminated. Use in unoccupied rooms.

Surface Defense Wipes - #127745

- Cleans and disinfects in one step. Perfect for surfaces that are touched frequently - door knobs, keyboards, toys, bed frames, wheel chairs and more. Two minute contact time required.

Concentrated Disinfectants

Power Tabs - #127687

- Concentrated bleach tablets dissolve in water. Safer to use than common liquid household bleach. Four minute contact kill time against viruses and bacteria including C-diff which usually require 10 minutes. Effective in one minute against Norovirus and COVID-19.

Terg-O-Cide Concentrate - #121173

- Super concentrated - diluted at a ratio of 1:64 (2 ounces per gallon of water) Terg-O-Cide provides 660 ppm of active quaternary germicide making it highly effective against a broad spectrum of pathogenic microorganisms. Use stronger solutions for tougher cleaning jobs. Ten minute contact time required.

NI-712 Disinfecting Cleaning Concentrate - #103098

- A multi-purpose, pH neutral, phosphate-free, quaternary base, germicidal detergent and disinfectant. Diluted at a ratio of 1:64 (2 ounces per gallon of water) NDCC provides 848 ppm of active quaternary germicide. Disinfects, cleans and deodorizes in one labor-saving step. Ten minute contact time required.

Ecolution Disinfectant - #115411

- Concentrated, pH neutral hospital grade disinfectant. Fragrance and dye free. Diluted at a ratio of 1:64 (2 ounces per gallon of water) Ecolution provides 700 ppm of active quaternary germicide. Over 125 kill claims including the Human Coronavirus. Ten minute contact time required.

Po₂wer DC - #125752

- A powerful, EPA registered, hydrogen peroxide and peracetic acid disinfecting cleaner that kills various bacteria and viruses when diluted at 1:64 (2 ounces per gallon of water). Five minute contact time.
